WRDS usage: an update for CERF (Michaelmas / Lent 2018-19)
Introduction

On behalf of the students, researchers, faculty, and staff of the University of Cambridge I’d like to extend thanks to CERF for their continued support and funding for specialist financial datasets through the WRDS platform.

Those who access these datasets form a unique Cambridge community, but one that continues to evolve year on year. Last year’s major development was the discovery that researchers across the University were utilising the many data points available across these datasets to test complex algorithms in disciplines as varied as Astronomy and Computer Science. This year, we’ve continued to work closely with allied departments to promote WRDS use: the adoption of WRDS in teaching, learning and research at the Faculty of Land Economy is our focus over the next two years.

2018-19 initiatives

Having worked closely with Economics in the past, the Information & Library Services Team are now planning to work more closely with Land Economy students and researchers to promote WRDS and other financial datasets.

The Information & Library Team have added Ivy DB and MSCI GMI data to our WRDS offering. Like other WRDS products, these are accessed through the main WRDS subscription funded by CERF.

Highlights since Michaelmas 2017

- 83% increase in queries run on class accounts, almost all from non-CJBS accounts
- A big increase of unique data queries run: 2781, up from 1031 last year
- Increase in usage on CRSP and Compustat

Who are our users?

The Information & Library Services Team at Cambridge Judge Business School administer the WRDS data interface and the datasets contained therein on behalf of the University of Cambridge. WRDS data is available for academics and PhD students through individual accounts, and to taught and research MPhil students as part of ‘class accounts’. Class accounts offer an easy way for researchers at the beginning of their academic career to access complex financial data, and provide an opportunity for course leaders to include and place a strong emphasis on sophisticated interrogation of real data as part of their teaching and assessment.

Following a cull of inactive users over the summer vacation, we currently have 157 active users of the WRDS platform; with 70% of accounts registered to either University faculty or PhD students.

staff – 13 (CJBS, CRS, Economics, Engineering, Uni Admin Offices);

visitor – 8 (CJBS, CCFin/CERF, CBR, CRS, CCAF);

Research Assistant – 1 (Entrepreneurship Centre)

Individual accounts

Our WRDS subscription supports research across a range of University faculties and departments. We have a strong presence in Business, Economics and Land Economy, but we also support researchers working in fields as diverse as Astronomy, Mathematics, and Politics. New departments using WRDS data this year include History and Clinical Medicine.
WRDS offers access to complex, historical, financial data that is often exhaustive in its coverage and cannot be found elsewhere. The data is aimed at postgraduate-level study and above.

Class accounts

WRDS class accounts support teaching and research across the following courses:

At Cambridge Judge Business School:

- MBA
- EMBA
- MFin
- MPhils in Finance & MSO; Innovation, Strategy and Organization; Technology Policy; and Management
- Postgraduate Diploma in Entrepreneurship
- MSt Social Innovation
- MSt Entrepreneurship
- MAcc

Across the wider University:

- MPhil in Engineering for Sustainable Development (Engineering)
- MPhil in Bioscience Enterprise (Chemical Engineering and Biotechnology)
- MPhil in Economics (Economics)
- MPhils in Real Estate Finance, Environmental Policy, and Planning, Growth and Regeneration (Land Economy)
- Institute for Manufacturing courses
- Economics undergraduates
- Master of Studies at the Institute for Sustainability Leadership
- Land Economy undergraduates
- MPhil in Sociology

**How is the WRDS platform used?**

The WRDS platform can be accessed through its website [https://wrds-web.wharton.upenn.edu](https://wrds-web.wharton.upenn.edu) or through a SSH client. The majority of users access the datasets through a browser.
Usage data for those using the WRDS website is much more detailed than those accessing via SSH connection. The website data is described in detail below, but for a complete picture the raw query counts (including SSH queries) are as follows:
